**DAILY MESSAGE OF MARY, ROSE OF PEACE, TRANSMITTED IN the Chilca desert, LIMA, PERÚ,  
TO THE VISIONARY FRIAR ELÍAS DEL SAGRADO CORAZÓN**

The inner sun within each being is capable of illuminating the spiritual path and redemption, from beginning to end.

The inner sun can shine, more or less, according to the inner attitude of the human being and according to their thoughts.

The inner sun can connect us with our essences, and our essences can connect us with the Creator Universe.

The inner sun is capable of opening doors to the universes and of closing doors to the hells.

Who lives based on the manifestation of their inner sun will one day know how to ignite it, safeguard it and awaken it to radiate inner love and healing to the world.

The inner sun is related to our lineage, and the lineage of each being can become conscious according to the intensity with which the inner sun shines.

If the inner sun has the habit of praying, it will know how to distinguish with premeditation when it is dimming and it will know what to do in order to repair this.

The inner sun is what relates us to the universe and it is what spiritually registers the history of our evolution.

The inner sun is the means for us to be in communion with universal life.

I thank you for responding to My call!

Who blesses you,

Your Mother Mary, Rose of Peace
